Ex Parte Quayle

As indicated in the Interview of 28 September 2010, the Office erred in sending out a Notice of Abandonment, because the application was not actually abandoned.

Allowable Subject Matter

The Board of Patent Appeals and Interferences affirmed the rejection(s) against independent claim(s) 1 and dependent claims 2-4 and 6-7. Dependent claim 5 remains objected to as depending upon a rejected claim. There are no allowed claims in the application. The independent claim(s) and claims 2-4 and 6-7 is/are cancelled by the examiner in accordance with MPEP § 1214.06. Applicant is given a TWO MONTH TIME PERIOD from the mailing date of this letter in which to present the dependent claim 5 in independent form to avoid ABANDONMENT of the application. NO EXTENSIONS OF TIME UNDER 37 CFR 1.136(a) WILL BE GRANTED. Prosecution is otherwise closed.

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: There is no disclosure in the specification which mentions

the step of firing the porcelain at a temperature ranging from about 780 C to about 870 C.

As pointed out in **MPEP 608.01(o)**:

Note that examiners should ensure that the terms and phrases used in claims presented late in prosecution of the application (including claims amended via an examiner's amendment) find clear support or antecedent basis in the description so that the meaning of the terms in the claims may be ascertainable by reference to the description, see 37 CFR 1.75(d)(1). If the examiner determines that the claims presented late in prosecution do not comply with 37 CFR 1.75(d)(1), applicant will be required to make appropriate amendment to the description to provide clear support or antecedent basis for the terms appearing in the claims provided no new matter is introduced.

As indicated above, examiner could not find any antecedent basis for the language and any support appears to be very unclear. Thus it is deemed that a prima facie showing has been made of lack of clear support or antecedent basis. The burden is now on applicant to demonstrate clear support or antecedent basis for the claim language.

Priority

Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 119(e) as follows:

The later-filed application must be an application for a patent for an invention which is also disclosed in the prior application (the parent or original nonprovisional application or provisional application). The disclosure of the invention in the parent application and in the later-filed application must be sufficient to comply with the

requirements of the first paragraph of 35 U.S.C. 112. See *Transco Products, Inc. v. Performance Contracting, Inc.*, 38 F.3d 551, 32 USPQ2d 1077 (Fed. Cir. 1994).

The disclosure of the prior-filed application, Application No. 08/870,965, fails to provide adequate support or enablement in the manner provided by the first paragraph of 35 U.S.C. 112 for one or more claims of this application. Present claim 5 requires firing the porcelain at a ranging temperature of from about 780 to about 870C. The prior filed application does not provide support for this. The closest relevant support that Examiner could find in the prior-filed application was a firing of the starting components as indicated by claims 11, 16 and 20 in the prior-filed application. Firing of the starting components to create the porcelain does not support a step of firing the porcelain.

This application repeats a substantial portion of prior Application No. 08/870,965, filed 6/6/1997, and adds and claims additional disclosure not presented in the prior application. Since this application names an inventor or inventors named in the prior application, it may constitute a continuation-in-part of the prior application. Should applicant desire to obtain the benefit of the filing date of the prior application, attention is directed to 35 U.S.C. 120 and 37 CFR 1.78.

Conclusion

This application is in condition for allowance except for the following formal matters:

Claim 5 not being in independent form (see above) and the lack of antecedent basis for the firing step in the specification (see above objection).

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
